Education

University of California, San Diego Sep 2025 – Dec 2026
Master of Science in Data Science, GPA: 4.00/4.00 *San Diego, CA*
- **Coursework:** Algorithms for Data Science, Efficient AI, AI Engineering, Machine Learning, Statistical Modeling, Stochastic Optimization

MPSTME, NMIMS University Jun 2019 – Feb 2023
Bachelor of Technology in Information Technology, GPA: 3.65/4.00 *Mumbai, India*
- **Coursework:** Data Structures and Algorithms, Advanced Algorithms, Object-Oriented Programming in Java, Software Engineering, Database Systems

Experience

Amazon Web Services *[Python, AWS Lambda, Docker, CDK, CI/CD]* Jun 2026 – Sep 2026
Software Development Engineer Intern, Amazon Connect *Seattle, WA*
- Designed and shipped a **Staff Schedule Service**, a synchronous Python API for real-time, p99 latency imrpoved by **43%** and enabling decision workflows for staffing what-if scenarios.
- **Benchmarked the service against the production baseline** across **8 KPIs**, validating feature parity and comparing asynchronous, synchronous, and optimized implementations on latency, throughput.
- Developed a **metrics & alarm monitoring dashboard** to track 8+ FCS operational KPIs, establish benchmark thresholds, and flag deviations in staffing and service metrics

FedEx *[Python, SQL, SAS, Azure, Power BI]* Jun 2023 – Jul 2025
Data Analyst, Center of Excellence (Analytics & Automation) *Mumbai, India*
- Led **end-to-end analysis** of transactional and pricing data across 6+ business scenarios and 15+ KPIs, identifying revenue trade-offs across a **$14.8B+ portfolio** and translating into actionable recommendations for leadership.
- Built Python , SQL, SAS ETL workflow to evaluate monthly data pipeline and automate validation improving performance by **60%**, reducing turnaround time by **80%**, and eliminating **40+ hours/month** of manual analysis.
- Partnered with **Forecasting, Sales, Finance, Strategy, and Engineering** to gather business requirements, define analytical logic to deliver**Power BI dashboards**: performance gaps, and actionable business insights.

Gamaka AI *[Python, TensorFlow, NLP, RAG, Vector Search]* May 2022 – Jun 2022
Quantitative Researcher *Remote*
- Conducted quantitative research on conversational AI performance, evaluating **retrieval quality, intent classification, response relevance, and inference latency** across diverse query patterns.
- Designed controlled experiments to analyze **model and retrieval trade-offs**, using error analysis and performance metrics to identify failure patterns and optimize preprocessing, ranking, and inference strategies.
- Built reproducible Python-based evaluation pipelines to benchmark model variants and translate experimental findings into improvements in **accuracy, response latency, and system reliability**.

Technical Projects

AI-Powered Early Churn Warning System *[Python, SQL, Machine Learning]* 2025
- Built an ML-based churn detection pipeline using **10M+ shipment and account records** to generate customer risk scores and automated alerts, improving **early churn detection by 40%**.

AI-Powered Trading Signal Analytics *[Python, SQL, Machine Learning]* 2025
- Built an AI-driven trading analytics system using historical market data to generate, comparing strategy performance, risk, and returns across multiple market scenarios to provide **data-driven recommendations**.

Technical Skills

- **Languages:** Python, SQL, Java, C++, TypeScript, JavaScript, R, SAS
- **Data & Analytics:** Data Analysis, Exploratory Data Analysis, ETL Pipelines, Relational Databases, Data Modeling, Data Quality & Validation, Query Optimization, Statistical Modeling, Forecasting, KPI Analysis, Scenario Analysis, Power BI, Tableau, Databricks
- **AI / Machine Learning:** Predictive Modeling, Feature Engineering, Model Evaluation, Anomaly Detection, Machine Learning, NLP, TensorFlow, RAG, Vector Search
- **Generative AI & Agentic AI:** LLM Applications, Prompt Engineering, AI Agents, LangGraph, LangChain, RAG Pipelines, Tool Calling, Workflow Orchestration, Evaluation
- **Cloud & Engineering:** AWS Lambda, Amazon S3, Docker, Azure, CI/CD, Git, REST APIs, System Design, SDLC, Code Review, Integration Testing
- **Business & Collaboration:** Requirements Gathering, Business Analysis, Stakeholder Management, Cross-Functional Collaboration, Process Improvement, Problem Solving, Strategic Recommendations, Technical Documentation
