Education

University of California, San Diego Sep 2025 – Dec 2026
M.S. Data Science ***(GPA: 4.00/4.00)*** *San Diego, CA*
- Coursework: Algorithms for Data Science, Efficient AI, AI Engineering, Machine Learning, Statistical Modeling, Stochastic Optimization

Mukesh Patel School of Technology Management & Engineering, NMIMS Jun 2019 – Feb 2023
B.Tech. Information Technology ***(GPA: 3.65/4.00)*** *Mumbai, India*
- Coursework: Data Structures & Algorithms, Advanced Algorithms, Object-Oriented Programming, Software Engineering, Database Systems

Experience

Amazon Web Services ***[Python, AWS Lambda, Docker, CDK, CI/CD]*** Jun 2026 – Sep 2026
Software Development Engineer Intern, Amazon Connect *Seattle, WA*
- Designed and shipped the **Eliza Staff Scheduling Service**, a scalable Dockerized Python AWS Lambda API, reducing **p99 latency by 80%** for real-time staffing-metric recomputation.
- Engineered modular service components using **dependency injection, data resolvers, and fallback mechanisms**; improved reliability through canary testing, code reviews, and CI/CD deployment validation.
- Investigated distributed service failures across **Lambda, S3, dependencies, and API payloads**; authored HLDs and partnered across teams on AppSec, threat modeling, and production reliability.

FedEx ***[Python, SQL, SAS, Azure, Power BI, Machine Learning]*** Jun 2023 – Jul 2025
Data Scientist, Center of Excellence (Analytics & Automation) *Mumbai, India*
- Built an **early-warning churn detection model** using shipment frequency, volume trends, and customer engagement features across **10M+ records and 200+ accounts**, applying **Random Forest and Gradient Boosting** to identify customers at risk of volume decline.
- Evaluated model performance using **precision, recall, and business KPIs**, generating account-level risk scores and automated alerts that improved **early churn detection by 40%** and enabled revenue decisions.
- Built production **SQL/Python/SAS ETL and validation workflows** to automate feature preparation and data-quality checks, partnering with Sales, Forecasting, Finance, and Strategy to translate model insights into actionable recommendations and Power BI reporting.

Leadership, Teaching & Entrepreneurship

- **Teaching Assistant, UC San Diego (2026):** COGS 18 Introduction to Python.
- **Founder & CEO, RevsCosmetics (2020–2024):**startup to **INR 10 lakh revenue and 500+ orders**.
- **Women in Tech, Society of Women Engineers:** led women-in-technology initiatives and mentored students.

Projects

Personalized AI Fashion Assistant *[Python, LangChain LangGraph]* 2026
- Proposed a multimodal recommendation pipeline for Amazon Shopping combining image understanding, occasion context, and TikTok trends to recommend personalized accessories.
- Built a LangGraph/LangChain agent with tool calling and RAG to retrieve Amazon catalog products and rank them by visual, style, occasion, and trend relevance.

TikTok Trend Forecasting *[Python, Pandas, XGBoost, TensorFlow, NLP, Time Series]* 2025
- Built a **time-series forecasting pipeline** to predict future TikTok engagement using historical views, likes, comments, shares, follower growth, and posting frequency.
- Trained **XGBoost and time-series models** with NLP-derived features from video descriptions and hashtags to identify content patterns associated with rising engagement.

Technical Skills

- **Languages:** Python, SQL, Java, C++, R, SAS
- **Machine Learning:** Scikit-learn, TensorFlow, PyTorch, XGBoost, Pandas, NumPy, SciPy, Statsmodels, Feature Engineering, Predictive Modeling, Time-Series Forecasting, Classification, Regression, Anomaly Detection, Model Evaluation, Cross-Validation, Hyperparameter Optimization
- **Generative AI & Agentic AI:** LangChain, LangGraph, RAG, Vector Databases, Embeddings, NLP, LLMs, Tool Calling, Function Calling, Multimodal AI, LLM Evaluation, AI Agents
- **ML Engineering & Cloud:** AWS SageMaker, Amazon S3, AWS Lambda, Databricks, Docker, CI/CD, Git, REST APIs, Model Deployment, Automated Testing, Code Review
- **Data Engineering:** ETL Pipelines, Data Modeling, Data Quality, Query Optimization, Power BI, Tableau
