Education

University of California, San Diego Sep 2025 – Dec 2026
M.S. Data Science ***(GPA: 4.00/4.00)*** *San Diego, CA*
- Coursework: Web Recommendations systems, ML systems, Scalable Systems, Human- centered AI

Mukesh Patel School of Technology Management & Engineering, NMIMS Jun 2019 – Feb 2023
B.Tech. Computer Science *Mumbai, India*
- Coursework:Computer Networks, Data Structures & Algorithms, Advanced Algorithms, Object-Oriented Programming, Software Engineering, Database Systems, Computer Architecture

Experience

Amazon Web Services ***[Python, AWS Lambda, Docker, CDK, CI/CD]*** Jun 2026 – Sep 2026
Software Development Engineer Intern, Amazon Connect *Seattle, WA*
- Designed a **Staff Scheduling Service**, a synchronous Dockerized Python REST API on AWS Lambda handling **170K requests/day**, cutting **p99 latency by 52%** versus 10+ asynchronous production baselines.
- Engineered an **ML inference forecasting API** on **SageMaker multi-model endpoints, S3, and DynamoDB**, serving 15-minute staffing forecasts and what-if recommendations in **under 2 seconds** with data resolvers and fallback paths.
- Exposed both APIs as **tools for an LLM agent**, defining structured, low-latency request/response schemas for **tool calling** and enabling a partner team's **Q4 agentic AI launch**.
- Optimized the shared queue-modeling package with **batched NumPy vectorization** of Erlang-C calculations, then shipped via **feature-flag phased rollouts**, AppSec threat modeling, and CloudWatch alarms with **zero Sev-0 incidents**.

FedEx ***[Python, SQL, SAS, Azure, Power BI, Machine Learning]*** Jun 2023 – Jul 2025
Data Scientist, Center of Excellence (Analytics & Automation) *Mumbai, India*
- Led pricing and revenue analysis across a **$14.8B+ portfolio**, modeling **6+ pricing scenarios** across **15+ KPIs** and **Power BI dashboard** to deliver **strategic recommendations that informed leadership decisions**.
- Developed, optimized, and maintained an **early-warning churn detection model** in **Python (scikit-learn)** on **10M+ shipment records** across **200+ accounts**, engineering volume-trend and engagement features to generate account-level risk scores and automated alerts that **improved early churn detection by 40%**.
- Designed and maintained **weekly refreshed ETL pipeline** in **Python, Fivetran and SAS** processing **$10B+ in shipping revenue data** from **5+ data sources** into **Azure** improving pipeline performance by **60%**, cutting turnaround time by **80%**, and eliminating **40+ hours/month** of manual work.
- Served as **shadow PM for a pricing automation bot** across the full product lifecycle: led **requirements gathering** with **10+ Pricing and Sales stakeholders**, wrote **PRDs, user stories, and acceptance criteria**, authored **30+ UAT test cases**, and drove delivery with engineering, automating **4 pricing workflows**.

Projects

Personalized AI Fashion Assistant *[Python, LangChain, LangGraph, RAG]* 2026
- Built a multimodal **LangGraph agent** with RAG and tool calling to recommend accessories from outfit photos.
- Ranked influencer suggestions by style and trend fit, outperforming keyword search in an **A/B evaluation**.

TikTok Trend Forecasting *[Python, PyTorch, TensorFlow, XGBoost, NLP, Time Series]* 2025
- Built a **time-series forecasting** pipeline with XGBoost and **LSTM models**, predicting 7-day engagement at **18.7% MAPE** vs. 30.7% baseline.
- Built a **content recommendation system** ranking rising sounds and videos from caption and hashtag NLP features at **0.81 ROC-AUC**.

Technical Skills

- **Languages:** Python, SQL, Java, C++, C, R, SAS, JavaScript, TypeScript, HTML/CSS
- **Software Engineering:** REST APIs, FastAPI, Node.js, React, Docker, AWS (Lambda, S3, DynamoDB), CI/CD
- **Databases & Tools:** PostgreSQL, MySQL, MongoDB, Git, Linux, Bash, Jupyter
- **Data Science & Analytics:** Pandas, NumPy, Time-Series Forecasting, A/B Testing, Power BI, Tableau
- **ML Engineering:** PyTorch, TensorFlow, scikit-learn, XGBoost, Hugging Face, SageMaker, Model Deployment
- **AI & LLMs:** LangChain, LangGraph, RAG, Vector Databases, Embeddings, AI Agents, LLM Evaluation
- **Product Management:** User Stories, Roadmapping, Backlog Prioritization, Stakeholder Management

Leadership, Teaching & Entrepreneurship

- **Teaching Assistant, UC San Diego (2026):** COGS 18 -Introduction to Python and DSC 152 - Applied Statistical Data Analysis and Inference; supported **800+ students** through sections, office hours, and grading.
- **Founder & CEO, RevsCosmetics (2020–2024):** Beauty brand from **0 to 1**, owning customer discovery, product development, e-commerce launch, and growth; scaled to **$50k+ YOY revenue** and **500+ orders**.
- **Women in Tech, Society of Women Engineers:** Built a community of **100+ students** and mentored members on technical skills, internships, and career growth through EDGE UCSD mentors program.
- **Content Creator & Podcast Host:** Created lifestyle and career content and hosted a podcast featuring industry guests; ran **cross-collaborations** with creators, reaching **20K+ followers/listeners** across **8+ episodes**.
